Page 134 Page 136 1 A. It's -- it's my experience in the insurance 1 questions. industry I've worked with many insurance companies BY MS. KLIEBENSTEIN: over the years. They all measure combined ratio 3 Q. So is the concept of combined ratio just a pretty much the same way. different way to present profitability? 5 Q. Did you confirm that Federal calculates combined 5 A. It's the way the insurance company requires you to ratio the same way? report profitability. 7 A. Based on this definition, yes. 7 Q. And so --8 Q. How did you confirm that Federal calculates 8 A. On an indirect basis. combined ratio the same way? 9 Q. -- anything under 100 percent reflects a profit, 10 A. I asked during the calls -- one of the calls. 10 and anything over a hundred percent reflects a 11 Q. You don't recall which one? 11 loss? 12 THE WITNESS: Yup? 12 A. Loss. Correct. 13 MS. JANUS: Can we table that and talk 13 Q. And at Federal, do you know if this combined ratio includes all gross written premium dollars and all 14 about it at our next break just so I can 15 understand what's going on? Or do you want us to 15 company expenses? -- can we take a moment to talk now if you want to 16 A. It would include earned premium dollars. 16 17 continue? 17 Q. And what expenses? 18 BY MS. KLIEBENSTEIN: 18 A. It would include loss expenses as well as internal 19 Q. Are you concerned that answering the question will and external expense. 20 -- will review -- will reveal attorney-client 20 Q. And what are internal expenses? 21 privilege? 21 A. People, buildings, equipment. Things like that. 22 A. It's privileged. Yes. 22 Q. What's an external expense? 23 Q. So the phone call involved -- did not involve a 23 A. Commission, premium tax to the government. Stuff Federal employee, it was a call with just lawyers? that they have to pay to do business. 25 A. It did -- it did involve Federal employee. 25 Q. And did you confirm that those are -- those Page 135 Page 137 MS. KLIEBENSTEIN: Then I --1 expenses are included in the Federal combined 1 2 2 MS. JANUS: I need to have a conversation ratio expenses? 3 with him to just understand what the situation --3 A. Yes. By looking at their annual report. 4 Q. Looking at 41 --4 it's fine, you don't need to say anything more 5 A. Um-hm. 5 about it, but I think we just need to have a short 6 Q. -- what's the basis for your opinion in 41? conversation. We can do that now Heather, or we 7 7 A. My experience in the insurance industry as a can do it at our next break. It's up to you. BY MS. KLIEBENSTEIN: senior executive at Allianz. 9 Q. So the question was: Do you remember which call? 9 Q. The last sentence says, "Federal improves its 10 combined ratio by adjusting premium rates and 10 A. Yes. 11 reducing expenses." Did you confirm that 11 O. And who was in attendance on that call? 12 A. External counsel. 12 statement with anyone at Federal? 13 A. I saw evidence of that in a lot of documents that 13 Q. Um-hm. I read. I don't remember specifically asking that 14 A. Internal counsel. 15 question directly. 15 Q. So was it -- was it Mr. Murphy that provided you 16 Q. Did you identify -- can you remember which with this factual information? 16 17 documents you saw that in? 17 MS. JANUS: Let's table that for now. I'm 18 A. Rates and rules. I'd have to -- I don't -- I 18 going to object to that, and I've -- I've asked 19 now several times. I'd like to be able to have a don't know. I'd have to look at the case 20 20 conversation with the witness to assess the documents again. 21 Q. Can you explain to me how reducing expenses 21 privilege situation and then be able to form a improves a combined ratio? 22 final conclusion on whether there's privilege. I 22 23 23 A. Less money paid out. just can't do it sitting here right now without 24 having an opportunity to talk with him. 24 Q. Could you flush that out a little bit more for the 25 MS. KLIEBENSTEIN: I'll just keep asking 25 record? Less money paid out what?

| Page 138 | Page 140 |

They can grow revenue from product new product |

Page 156 Page 154 1 A. In the -- absolutely. 1 was: Being able to make changes quickly can that 2 Q. What does it mean in the insurance context? 2 lead to increased revenue in the insurance field? 3 A. To me, it's the ability to dynamically change 3 MS. JANUS: Same objections. things quickly, be able to be agile to move when 4 THE WITNESS: I would say that any change 5 the market moves. made has the potential to affect it or not affect 6 Q. And what's -- what's the benefit of improving 6 it. I mean, it just depends on the rule that's agility, the business benefit of improving agility 7 changing and what it's changing to. in the insurance field? 8 BY MS. KLIEBENSTEIN: 9 A. To provide what the customer is looking for. 9 Q. Why would an insurance company want the ability to 10 Q. Whether it's a -- whether that's a new product, or 10 make changes quickly in the insurance context? a different price; is that right? 11 A. Because the -- for competitive reasons, for market 12 A. Or different coverage. 12 reasons, their -- experience losses, not 13 Q. And the point is to increase revenue; correct? 13 necessarily a top line issue but bottom line 14 A. Every business is looking to increase revenue. 14 issue. 15 Q. So the answer is yes; the point of improving 15 Q. In your answer, you mentioned an insurance company agility in the insurance context is to improve would want the ability to make changes quickly for 16 17 revenue? 17 competitive reasons. 18 A. Not always, but if I make a quick move, I might 18 A. Um-hm. lose money and lose revenue. So I don't want to 19 Q. Give me an example. 20 -- I can't -- I would not say agility always 20 A. Somebody introduced a new product and you want to 21 contributes to revenue. It may not. 21 get your product to market to compete. 22 Q. Oh. That -- that wasn't my question. A goal of 22 Q. To write more policies and get more gross written 23 improving agility in the insurance question -- in 23 premium; correct? 24 the insurance industry is to -- let me ask it a 24 MS. JANUS: Object to the form of the 25 different way. 25 question. Page 155 Page 157 1 At least one goal from improving agility in THE WITNESS: Every business wants to grow 1 2 the insurance context is to increase revenues; 2 its -- grow its revenue and improve its profit. 3 correct? 3 Every business. 4 A. That's a goal. BY MS. KLIEBENSTEIN: 5 Q. So the answer is yes; at least one goal? 5 Q. I'm not -- that's sort of an answer to my question 6 A. A goal of -- of anything you do is to increase but not really. So the question was: You want to 7 revenue, but ... 7 get your product to market more quickly so that 8 Q. And the second bullet, make changes quickly you can hopefully, don't know for sure, hopefully without programming, do you know what -- what write more policies and get more premiums? 10 capability that refers to in the insurance 10 A. All of the technology and resources of an context? 11 11 insurance company are focused on trying to sell 12 A. Yeah. It's -- it's the reason that Federal 12 more policies and reduce the amount of losses, 13 acquired Blaze was to move the rules from the IT 13 claims that they -- they have. 14 programmers to externalize rules. 14 So I don't look at the technology in 15 Q. And what is the business benefit from doing that? 15 isolation. I look at it in -- collectively, all 16 A. Faster changes to the rules. 16 of the people, process, and technology that are 17 Q. And can faster changes to the rules lead to 17 out there. 18 increased revenue? 18 Changing a rule might require changes in 19 MS. JANUS: Object to the form of the 19 other parts of the business at the same time, and 20 question. Calls for hypothetical. Calls for 20 if those changes weren't made, it would have a 21 speculation. It's vague. 21 negative effect on the business, not a positive 22 THE WITNESS: Depends on how the rule 22 effect on the business. 23 23 changes. So trying to take this in isolation is a

no, but take it collectively with all of the

technology, and people, and process that are

- 1 A. Um-hm.
- 2 Q. You state that, "Blaze is not visible to
- 3 operational employees of Federal and not visible
- 4 to agents and brokers that interact with Federal
- 5 employees."
- 6 A. Correct.
- 7 Q. How is that statement -- how is that statement
- 8 relevant to the scope of your assignment in this
- 9 case?
- 10 A. How it's used in the -- the business operation. I
- looked at the -- at the screens that were the UI
- that supported the applications that are involved
- here, and the -- the customers, the policyholders,
- 14 the agents don't know that rules engine set behind
- 15 there. They don't know that.
- So it's just in normal course of business
- they are using the policy, the various AD-MIN
- 18 systems that -- that Federal provides them, and
- 19 the rules engines sets behind there.
- 20 Q. And let's just accept that as true for now.
- 21 A. Um-hm.
- 22 Q. How does that fact play into the value of Blaze
- Advisor with respect to the revenues and profits
- 24 of Federal?
- 25 A. Basically Blaze is invisible, and this was

- Page 160
 prompted by the conversation I had with Ellen and
- 2 Helen that said they didn't even know that -- that
- 3 Blaze was part of the system that they use on a
- 4 day-to-day business -- or day-to-day.
- 5 Q. And in the next paragraph, it ends with, "Blaze is
- 6 a technology that indirectly supports a small
- 7 number of over 35,000," --
- 8 A. Um-hm.
- 9 Q. "Federal employees." Do you know what -- what the
- 10 percentage is of employees that interact with
- 11 Blaze?
- 12 A. I don't -- I don't have a percentage, but
- certainly could figure that out quickly.
- 14 Q. And how would you go about doing that?
- 15 A. Get -- get a count of the number of people
- involved in the -- the applications that are used
- by CSI Express, or -- which is the 80 percent of
- the usage of Blaze I think. Based on what I read.
- 10 the usuge of Blaze Filming. Based on What Flead
- 19 Q. Looking at the diagram on the top of Page 15 --
- 20 A. Um-hm.
- 21 Q. -- where does that diagram come from?
- 22 A. It's the ID and property casualty business
- 23 activity model, and I thought I cited it
- somewhere. I did cite it. It's on the previous
- 25 page.

Page 16

- 1 Q. So this is not a diagram of Federal specifically?
- 2 A. No. It's -- correct. It's an industry model for
- a property and casualty insurance company.
- 4 Q. And did you -- is it your opinion that this model
- 5 applies to Federal?
- 6 A. Yes.
- 7 Q. And how -- how did you arrive at that opinion?
- 8 A. Based on my experience. I was CIO for a global
- 9 property and casualty company.
- 10 Q. Paragraphs 55, 56, and 57.
- 11 A. Um-hm.
- 12 Q. What is your support for the opinions in those
- 13 paragraphs?
- 14 A. Make sure real quick. This is based on my use of
- 15 the industry model for developing strategy to
- support the business.
- 17 Q. So the -- the opinions in Paragraph 56 stem from
- the IBM model?
- 19 A. Correct.
- 20 Q. So you counted nine major business activities in
- the IBM model?
- 22 A. Major, major categories. Yeah. Business activity
- 23 categories.
- 24 Q. And 59 activity groups?
- 25 A. Correct.

Page 162 Page 164 1 Q. And claims management specifically has 11 activity identification as Exhibit 453.) 1 groups? BY MS. KLIEBENSTEIN: 3 A. Yeah. As an example. 3 Q. I'm handing you what's been marked as Exhibit 453. 4 Q. Claims management, and that was counted, again, Is this the document you were just referring to? from the IBM model? 5 A. I believe so. Let me look at the page and I'll 6 A. Correct. tell you for sure. Yes. 7 Q. And Paragraph 57 has a number of subheadings under 7 Q. So tell me what I'm looking at in Slide 11. each enumerated group. Did those subheadings also 8 A. Slide 11 is FICO's interpretation of where Blaze come from the IBM activity model? touches the insurance process, business processes. 10 A. They did. 10 Q. And do you agree or disagree with FICO's 11 Q. And in Paragraph 58, you opine that, "Each work 11 interpretation? item within an activity group is associated with 12 A. The way they have categorized things I kind of 13 business rules and decisions that are being made 13 disagree because it's too broad and generic in 14 14 by employees within the Federal business some cases. 15 operation." Correct? 15 For example, underwriting. It doesn't 16 16 A. Correct. touch every piece of underwriting. So therefore 17 Q. And what is the support for that opinion? 17 it's -- it's overstating what it does in 18 A. Again, the activity model illustrates a property 18 underwriting, but in the other areas, like product and casualty company and what they have to do on a 19 definition, they call that out three times, three 20 daily basis to operate, and based on my 20 different areas, rate maintenance, and where Chubb 21 21 experience, Federal does all of these activities -- Federal is using it in product management 22 and work items associated with those activity 22 mostly in rate development and maintenance. So 23 23 things like that. groups. 24 Q. Did you confirm with anyone at Federal that they 24 O. You mentioned rate maintenance. Where can I find do in fact do all of these work items and that on Slide 11? 25 Page 163 Page 165 activities? 1 A. It's not -- it's not on Slide 11. You know, I 1 2 A. No I did not. I did not. guess they include it under Number 5, which is 3 Q. And did you confirm with anyone from Federal that 3 pricing and rating, but that's over -- again, in fact each work item within an activity group is overstating where it actually touches this from a associated with business rules and decisions made Federal point of view (indicating). by employees within the Federal business 6 Q. And your position is that it -- Blaze only touches 7 operation? rate maintenance; is that right? 8 A. Rate development and maintenance as part of 8 A. No. 9 Q. Can you tell me what the red dots are? product management. Yeah. 10 A. Yeah. They are my interpretation of where Blaze 10 Q. So in your report, you went through and identified is touching those categories. 11 -- you took that information from Slide 11 and 12 Q. And did you confirm with anyone at Federal that 12 then tried to fit it in where it would fit within your interpretation was correct? 13 the IBM model? 14 A. Yes, and we compared it to the FICO chart, and 14 A. No. I -- I took the applications and the there are different charts. So there was 15 15 functions, the applications we're using, and I 16 questions about whether they applied, but in my 16 overlaid that onto this model. 17 opinion, this is where they applied in this model. 17 Q. Okay. 18 Q. What's the FICO chart? 18 A. Which is different than what FICO shows in Slide 19 A. FICO provided a chart that shows where Blaze 19 11. Because they also show it's claims touches an insurance process. It's a very generic 20 adjudication, and it's not being used for claims 21 adjudication within Federal. 22 Q. Can you identify that document in your report? 22 At the bottom of that chart, on Page 11, it 23 A. I did. Give me a moment. I don't remember what 23 shows utility functions as opposed to work groups the number was. Oh. It's 17111. 24 in the -- or categories in the business activity 25 (Whereupon material was marked for 25 model. So ... it's not a one-to-one correlation.

Page 178 1 Q. You're specifically referring to TAPS; correct?

- 2 A. Iam. Iam.
- 3 Q. Do you know how many -- and TAPS stands for what
- 5 A. Texas Accident Prevention. It's a workers' comp
- compliance requirement for the state of Texas.
- 7 Q. And so some insurance applications need to comply
- with TAPS in Texas; correct?
- 9 A. Correct.
- 10 Q. Do you know how many insurance policies that
- affects every year?
- 12 A. No I do not.
- 13 Q. Did you ask anybody?
- 14 A. It doesn't matter whether it's one or many, but
- no, I did not.
- 16 Q. So why do you say that the -- is it your opinion
- 17 that the features, functionality provided by Blaze
- 18 within the TAPS application could be done with an
- 19 Excel spreadsheet; correct?
- 20 A. That's what I was told. Yes.
- 21 Q. That's what you were told by whom?
- 22 A. Helen and Ellen.
- 23 Q. And did you do anything to independently verify
- that that statement was true?
- 25 A. I looked at the descriptions of all the use of

- Page 180 1 A. I don't recall the exact number, but they said a
- small number of people could have done this.
- 3 Q. How many is a small number of people?
- 4 A. I don't know. I didn't ask.
- 5 Q. Over how many years? Do you know?
- 7 Q. You don't know how many policies it involved;
- 9 A. Other than it was a low volume business. Workers'
- 10 comp in Texas is poor -- is probably a very low
- 11 volume business.
- 12 Q. Chubb is one of the largest insurance companies in
- 13 the world; correct?
- 14 A. Um-hm.
- 15 Q. They are one of the largest suppliers of business
- insurance in the United States; correct?
- 17 A. Right.
- 18 O. So a low volume of business to Chubb could be --
- 19 strike that. So you don't have an opinion one way
- 20 or the other as to the cost or expense Chubb would
- 21 have incurred to use an Excel spreadsheet instead
- 22 of Blaze Advisor in the TAPS application --
- 23 A. I do not.
- 24 Q. And you don't -- you have not undertaken an
- analysis to determine whether the use of a 25

Page 179

- TAPS within the depositions and documents that I 1
- 2 had, and it would confirm that it's a disclosure
- 3 type of check the box function that we disclose
- 4 properly as part of the process. So that's my
- only verification.
- 6 Q. And how would you use an Excel spreadsheet instead
- of Blaze to accomplish the same functionality?
- 8 A. I have an individual pull up the spreadsheet, go
- through the list of applications, and see if it
- 10 complied.
- 11 Q. But you don't know how many applications that
- 12 individual would have to look through?
- 13 A. And according to Ellen, it's a low volume
- 14 business. So I didn't ask how many policies. Low
- 15 volume usually means low, not many, and they said
- 16 that Blaze was used because it was there. It --
- 17 you know, it wasn't -- not Helen and Ellen didn't
- 18 say that because they didn't know Blaze existed.
- 19 Ramesh Pandey basically said they could have
- 20 easily used Excel as well.
- 21 Q. Do you know how many people would need to be
- 22 employed to undertake the same tasks as Blaze
- 23 Advisor with respect to the TAPS application to
- 24 perform the same functions using Excel
- 25 spreadsheet?

- spreadsheet in the TAPS application instead of 1
- 2 Blaze Advisor would yield the same results;
- 3 correct?
- 4 A. I -- I'm going by the word, the folks I spoke
- with, that they could use it that way.
- 6 Q. Do you know what percent of Federal's business
- rules were ever implemented into Blaze Advisor?
- 8 A. I couldn't get a count. So no I do not.
- 9 Q. What was your methodology then to determine in
- 10 Paragraph 69 to make the statement, "Only a
- 11 fraction of Federal's business rules and decisions
- 12 were ever loaded into Blaze Advisor," -- "Blaze to
- 13 assist Federal."?
- 14 A. There's hundreds of thousands of rules that are
- executed on a daily basis as part of this business 15
- 16 activity model, and if you look at the numbers of
- 17 rules that are loaded -- that are on that Fed
- 18 17914, it's a small amount compared to the total
- 19 rules that are being made on a daily basis.
- 20 Q. Do you know how many -- how many rules decisions
- 21 are being made at Federal on a daily basis?
- 22 A. I do not.
- 23 Q. Did you ask anyone?
- 24 A. I asked for total rules relative to plays, but I
- 25 didn't ask them for the total rules across all of

Page 181

Page 184 Page 182 their business model. No. 1 1 A. Um-hm. 2 Q. So you -- you asked to receive information on the 2 Q. -- is that an accurate summary? total rules relative to Blaze? 3 A. That's correct. 4 A. Um-hm. 4 Q. And you gave a hundred policy volume is a high 5 Q. And what was the answer you received? average premium; right? 6 A. It's in Schedule 17914 I believe, the list of 6 A. Right. rules that are associated with those applications. 7 Q. Do you know how many policies Federal writes in 8 Q. Oh. Those are the -- I'll get it for you. any year? 9 A. I think it's on my chart. 9 A. No. I don't have the exact number. 10 (Whereupon material was marked for 10 Q. It's in significant excess of a hundred policy in identification as Exhibit 454.) 11 any given year; correct? 12 BY MS. KLIEBENSTEIN: 12 A. Yes. It's way more than a hundred. 13 Q. I'm handing you what's been marked as Exhibit 454. 13 Q. Moving to Paragraph 74, again, as we discussed 14 A. Complexity of number of rules. 14 earlier --15 Q. Is this a document you're referring to? 15 A. Yeah. 16 Q. -- you conclude -- your opinion in 74 is that 16 A. It is. 17 Q. Did you ask to receive information about the total 17 based on your experience and not documentary number of rules being made at Federal companywide? 18 support from Federal? 19 A. In one of the discussions, was there a way to 19 A. Well, it's a small role, and if you look at the 20 count the total number of rules, and couldn't get 20 ecosystem and the amount of technology that's 21 21 that number, but they could -- because of Blaze, used, I have documentation on how many 22 they were able to count what rules were in Blaze. 22 applications and components, third party 23 Q. So you don't have any documentary support for your 23 components they use, and Blaze is a small part of opinion that only a fraction of Federal's business 24 that overall business process and ecosystem. So I 25 25 rules and decisions were ever loaded into Blaze; do have documents from -- from Federal on that. Page 183 Page 185 1 Q. Are you referring to -- jumping over to Paragraph 1 right? 2 A. It's in my experience, based on my experience of 2 87. 3 operating all these systems for an insurance 3 A. Um-hm. 4 Q. Were you referring to your opinion that Federal 4 company. 5 Q. So continuing on to Page 20, the statement that, has approximately 1500 applications? "Blaze's use is relatively small based on my 6 A. Correct. 7 experience with seven insurance companies in North 7 Q. How did you arrive at that opinion that Federal America," -that 1500 applications? 9 A. Um-hm. 9 A. Claudio Ghislanzoni communicated that to me in an 10 Q. -- that opinion is based on your experience and 10 interview, and it supports the total number of not any data from Federal; right? 11 systems, which is found in Fed 6248. 12 A. Correct. 12 MS. JANUS: Just speak up when you need a 13 Q. Paragraph 70 through 73 --13 break. 14 A. Um-hm. 14 THE WITNESS: Okay. 15 Q. -- is your support for those paragraphs solely 15 BY MS. KLIEBENSTEIN: your experience? 16 Q. One clarification on Paragraph 117. So we were 17 A. No. In 70, if we look at the Gartner article on just referring to 1500 different applications. 17 innovation technology insight basically defining 18 18 A. Yeah. 19 the business rules management system, and then 19 Q. It mentions 10 out of 107 proprietary insurance --20 20 A. Yeah. That -- that should have been 1500. I part of that is my own experience working with 21 Ratabase and other policy systems that had 21 picked up the wrong number. 22 Q. Okay. 22 components for rules management. 23 Q. In Paragraph 73, you provide an example of where 23 A. Should have been 1500. 24 you did not think a business rules engine should 24 Q. Did you look at any documents to confirm Federal 25 25 have been employed -has approximately 1500 applications?
